

NSF 342

A joint venture between the Wallcovering Association, ANSI and NSF International, the **NSF/ANSI 342 Sustainability Assessment for Wallcovering Products** was created to establish a unique standard for the wallcovering industry. The standard evaluates manufacturers and distributors in six key areas:

- Product design
- Product manufacturing
- Long-term value
- End-of-life management
- Corporate governance
- Innovation.

As part of our effort to advance this important program, we are providing the following information:

NSF342 Compliant Adhesives

Roman's Adhesive ECO888 is an adhesive that has been found to be compliant with NSF342 requirements and can be used with York Certified Commercial Wallcovering.

NSF342 Compliant Green Cleaning Products

With the focus on green cleaning strategies, York has investigated green products that have been found to be compliant with the standards of NSF342. *Berkley Green Ultra Concentrate Dish Soap (3760FC1)* – *Free & Clear* and *Seventh Generation's Natural Dish Liquid* are both compliant with NSF342 requirements and safe to use in moderation on York Certified Commercial Wallcoverings.

Reclamation Program

In an effort to aid in the extension of the wallcovering lifecycle, York has established Reclamation Program for its NSF342 certified product. Starting in mid-2013, information and forms will be available on our website, through NSF342 qualified distributors and through our customer service at York to help aid in reducing the impact on landfills and achieving waste management points for LEED.
