

Reduce the environmental impact of your projects by participating in the York Wallcoverings Reclamation Program.

### **Getting Started**

Note: All material returned to York Wallcoverings as reclaimed material must include a purchase order for the same linear yardage, at a minimum, of new NSF342 certified Wallcovering manufactured by York Wallcoverings.

- Obtain an application and fill it out completely.
- Applications can be obtained by contacting an NSF342 Qualified Distributor, calling a customer service representative at 1-800-375-YORK (9675) or visiting [www.yorkcontract.com](http://www.yorkcontract.com).
- Include an 8.5"x11" sample of the product sent in for reclamation. Samples allow us to properly identify the material and determine if it can be reclaimed safely.
- Please include your order number for newly purchased product with your application.
- Once the sample has been reviewed and approved, you will receive notification of approval for reclamation of York Certified Wallcovering.
- Ship approved wallcovering to the address listed below. Freight is the shippers responsibility.

### **Reclamation Preparation**

Reclaimed Wallcovering can be received only under the following stipulations:

- Confirm that the reclaimed Wallcovering is NSF342 Certified Wallcovering manufactured by York Wallcoverings
- Remove all construction debris before packaging up for shipment
- Do not include material that has been exposed to the elements, is contaminated or contains mold or mildew.
