

Five different types of printing presses and more than a century of printing experience gives York Contract unmatched printing capabilities. Combined with a variety of distinct substrates, a highly skilled studio, and an inexhaustible source of document designs in the York Archival Library, York Contract can be your best source for custom printing.

Our Commercial Custom Team is dedicated to working together with you to create unique options for your customer's needs. Call or email to learn more about customizing your next wallcovering project with York Contract.

**What types of custom possibilities does York offer?**

- |  |                    |                     |
|--|--------------------|---------------------|
| Digital printing – paper & 15 oz non-woven backed vinyl (3 1/2"-54") | Discontinued items | Embossing Finishes: |
| • Borders  | Mock-Up Material   | • flocking          |
| • Murals   | Color              | • glass beads       |
| • Sidewalls  | Design             | • glitter           |
|  | Scale              | • metallics         |
|  | Weight/substrate   | • sand              |

**What are the minimum run requirements for customs?**

We are committed to working with you on customs even if your yardage does not meet the minimum run requirement. Please use this chart as a general reference point. We have included the under/overages tolerances as well.

Print Types	Minimum Order Quantities	Under/Overage Tolerances
Commercial Gravure	750-1,000 yards (minimum)	+/- 10%
	1,001-2,000 yards	+/- 8%
	2,001+ yards	+/- 4%
Commercial Screen	1,500 yards (minimum)	+/- 10%
	2,501-5,000 yards	+/- 8%
	5,001+ yards	+/- 4%
Residential	600 S/R	TBD

**How long do customs take?**

Getting started with hand screen strike offs or CAD's only takes a couple of days. PDF's of existing designs can be provided even faster. After strike offs have been approved and we receive your purchase order for a custom, there is typically a 4 week turn around. If new print screens or cylinders have to be engraved, that can add approximately 2 weeks.

**What substrates are available?**

- Commercial vinyl options:
  - Non-woven backing 15oz Type II (York's 15oz nw vinyl is CA 01350 compliant.)
  - Non-woven backing 20oz Type II
  - Scrim backed 15oz Type II
  - Osnaburg backed 20oz Type II
- Non-woven breathable eco-friendly (CA 01350 compliant & 3rd party testing available)
- Residential paper (from managed forests – low VOC, water based inks)
- Borders – paper & vinyl (15oz non-woven vinyl borders are digitally printed)
